

BOSCH
Invented for life

This Month: *New 300 Series Third Rack Dishwashers*

SHEM63W55N

All 300 Series dishwashers now have a third rack that provides increased capacity and adjustability options, along with other convenient features.

What's New:

- 44 dBA for quieter dishwashers
- 16 place setting
- 30% more loading area with the standard 3rd rack
- FlexSpace™ Tines so it's easier to fit large, bulky items
- Speed 60® Cycle for dirty to clean and dry dishes in about 60 mins.
- Extra Dry Cycle is ideal for those hard-to-dry items
- Scoop handle door style for a sleek, streamlined look

Standard 3rd rack

Provides the perfect space for flatware, large utensils, measuring cups, or nearly anything else that's difficult to fit in a traditional dishwasher, while its V shape leaves room below both sides for taller items like stemware in the middle rack.

Door styles and color options:

Recessed Handle
SHEM63W55N—Stainless Steel
SHEM63W52N—White
SHEM63W56N—Black

Scoop Handle
SHSM63W55N—Stainless Steel
SHSM63W52N—White
SHSM63W56N—Black

Bar Handle
SHXM63W55N—Stainless Steel

Custom
SHVM63W53N—Custom Panel

RackMatic® adjustable middle rack

Easily adjusts to three different heights and up to 9 separate rack positions, allowing taller items like stemware to fit in the middle rack while leaving room for pots and pans below.

24/7 AquaStop®

Solid, molded base and sensors that can detect leaks and automatically shut off the water inlet.

FlexSpace™ tines

This convenient new feature lets you fold back every other tine in one simple step, so it's easier to fit your largest, bulkiest items. Available on lower racks in 300 Series models and up, it helps to hold pots and pans upright, leaving more room for your other dishes.

Ultimate drying performance

What is condensation drying?

All Bosch dishwashers use a condensation drying process. Instead of utilizing a heating element at the bottom of a dishwasher, condensation drying involves a number of dishwashing elements that work together to efficiently dry your dishes more hygienically than conventional air drying; and with minimal energy.

Here's how it works:

- The final rinse uses high-temperature water to make the dishes very hot.
- The stainless steel tub of the dishwasher cools faster than your dishes because stainless steel cools faster than glass and porcelain.
- Condensation occurs when the moist air in the dishwasher comes into contact with the cooler stainless steel tub, and turns into water droplets. These water droplets trickle down to the bottom of the dishwasher and are drained.

Benefits:

- Since it's a closed system with no fan, the cleaning process is more sanitary.
- With no exposed heating element, plastic utensils and dishes placed on lower rack will not melt.

For best results:

- Always use a liquid rinse aid.
- Select the Auto cycle.
- Press the Sanitize or Extra Dry option.
