

## The All-in-One Oven

Enjoy the benefits of multiple kitchen appliances in one streamlined oven. It's a Pizza Oven for artisanal pies, a BBQ Broiler for crispy charred meats, and yes—even an air fryer.

## Multiple kitchen appliances in one oven.

### 1. Air Fry

Uses convection fans to rapidly circulate dry, hot air so you can achieve crispy, delicious results – without the use of added oils in traditional frying. Perfect for everything from sweet potato fries to crispy shrimp and more.

### 4. Pizza Oven

Mimics the intense heat of a pizza oven to deliver artisanal pies in your kitchen. Heat from the upper and lower elements is circulated throughout the oven by the convection fan.

### 2. 12 Pass Broil

Best suited for large cuts of meat and poultry. Improved from the 8 pass broil, the 12 pass broil cooks faster and more evenly which delivers quick browning for juicy roasts with a beautiful crust.

### 5. Convection Pro (formerly Genuine European Convection)

Has a third heating element (*whereas regular Convection only has two*) and a fan to evenly circulate heat and deliver consistently perfect results, no matter where you place your pan in the oven.

### 3. BBQ Broil

Broil mode uses intense heat radiated from the upper element and delivers the perfect char, sear and grill without the mess. It is perfect for meats and bubbling crusts on casseroles.

### 6. Dough Proofer

Uses the upper and lower elements to maintain a low temperature, perfect for proofing bread or other yeast doughs.
