

Built-In Coffee Machine

BCM8450UC

Did You Know?

- Coffee is the 2nd largest commodity in the world behind oil
- Finland drinks the most coffee per capita
- The average American has 3.1 cups of coffee per day
- Coffee in moderation can help burn fat, improve your mood, and help you live longer

So grab a **Cup of Joe** and let us tell you about Bosch's Built-In Coffee!

Ease of Use

- **Colorful Touchscreen w/Stainless Steel Ring**
- **10 Pre-Programmed Drinks**
Coffee, Ristretto, Espresso, Espresso Macchiato, Latte Macchiato, Cafe Latte, Cappuccino, Milk Froth, Warm Milk and Hot Water
- MyFavorites Stores **8 Favorite Drinks**
- **Adjust** strength, size, and temperature
- Get More with **Double Dispensing***
- **Manually Adjustable** Beverage Dispenser

*not available on all drink selections

Performance

Ground or Whole Beans? We'll Take Both!

Whole bean container holds 1 pound of beans with a rubber seal to lock in freshness. No oily beans! Using ground? Insert 2 tbsp into the ground container and you have 90 seconds.

Adjust Coffee Grinds

Different beans require different grind settings. Easily adjust from Very Fine to a Coarse grind

Ceramic Discs

Highly durable ceramic discs provide precise grinding ability and minimal noise. Longer longevity than Stainless Steel

'Aroma Double Shot'

For a strong, intense coffee flavor and aroma—during the brewing process it provides a constant pressure and dispenses fresh beans for each shot instead of using the same beans twice

We Can Handle the Pressure

Barista quality coffee at 275 psi (19 bar) allows us to extract all the flavor and caffeine of each and every bean.

Mooooove Over Regular Milk

Use our double wall insulated milk container for any type of milk! You can use your own container too (like tetra packs). Just insert the straw properly

Maintenance

Automatic System Rinsing

The system rinses itself every time it's switched On and Off

Automatic Steam Cleaning for Milk System

A burst of steam clears the milk lines before and after each drink that uses milk

One Touch Descaling & Cleaning

The system prompts you when it requires cleaning or descaling. It can easily be done on demand with the touch of a button and on-screen directions

Cleaning Items

Dishwasher Safe: Milk line, connections, and brewing output

Handwash Only: Drip tray, water tank, milk canister, brewing system, and bean container

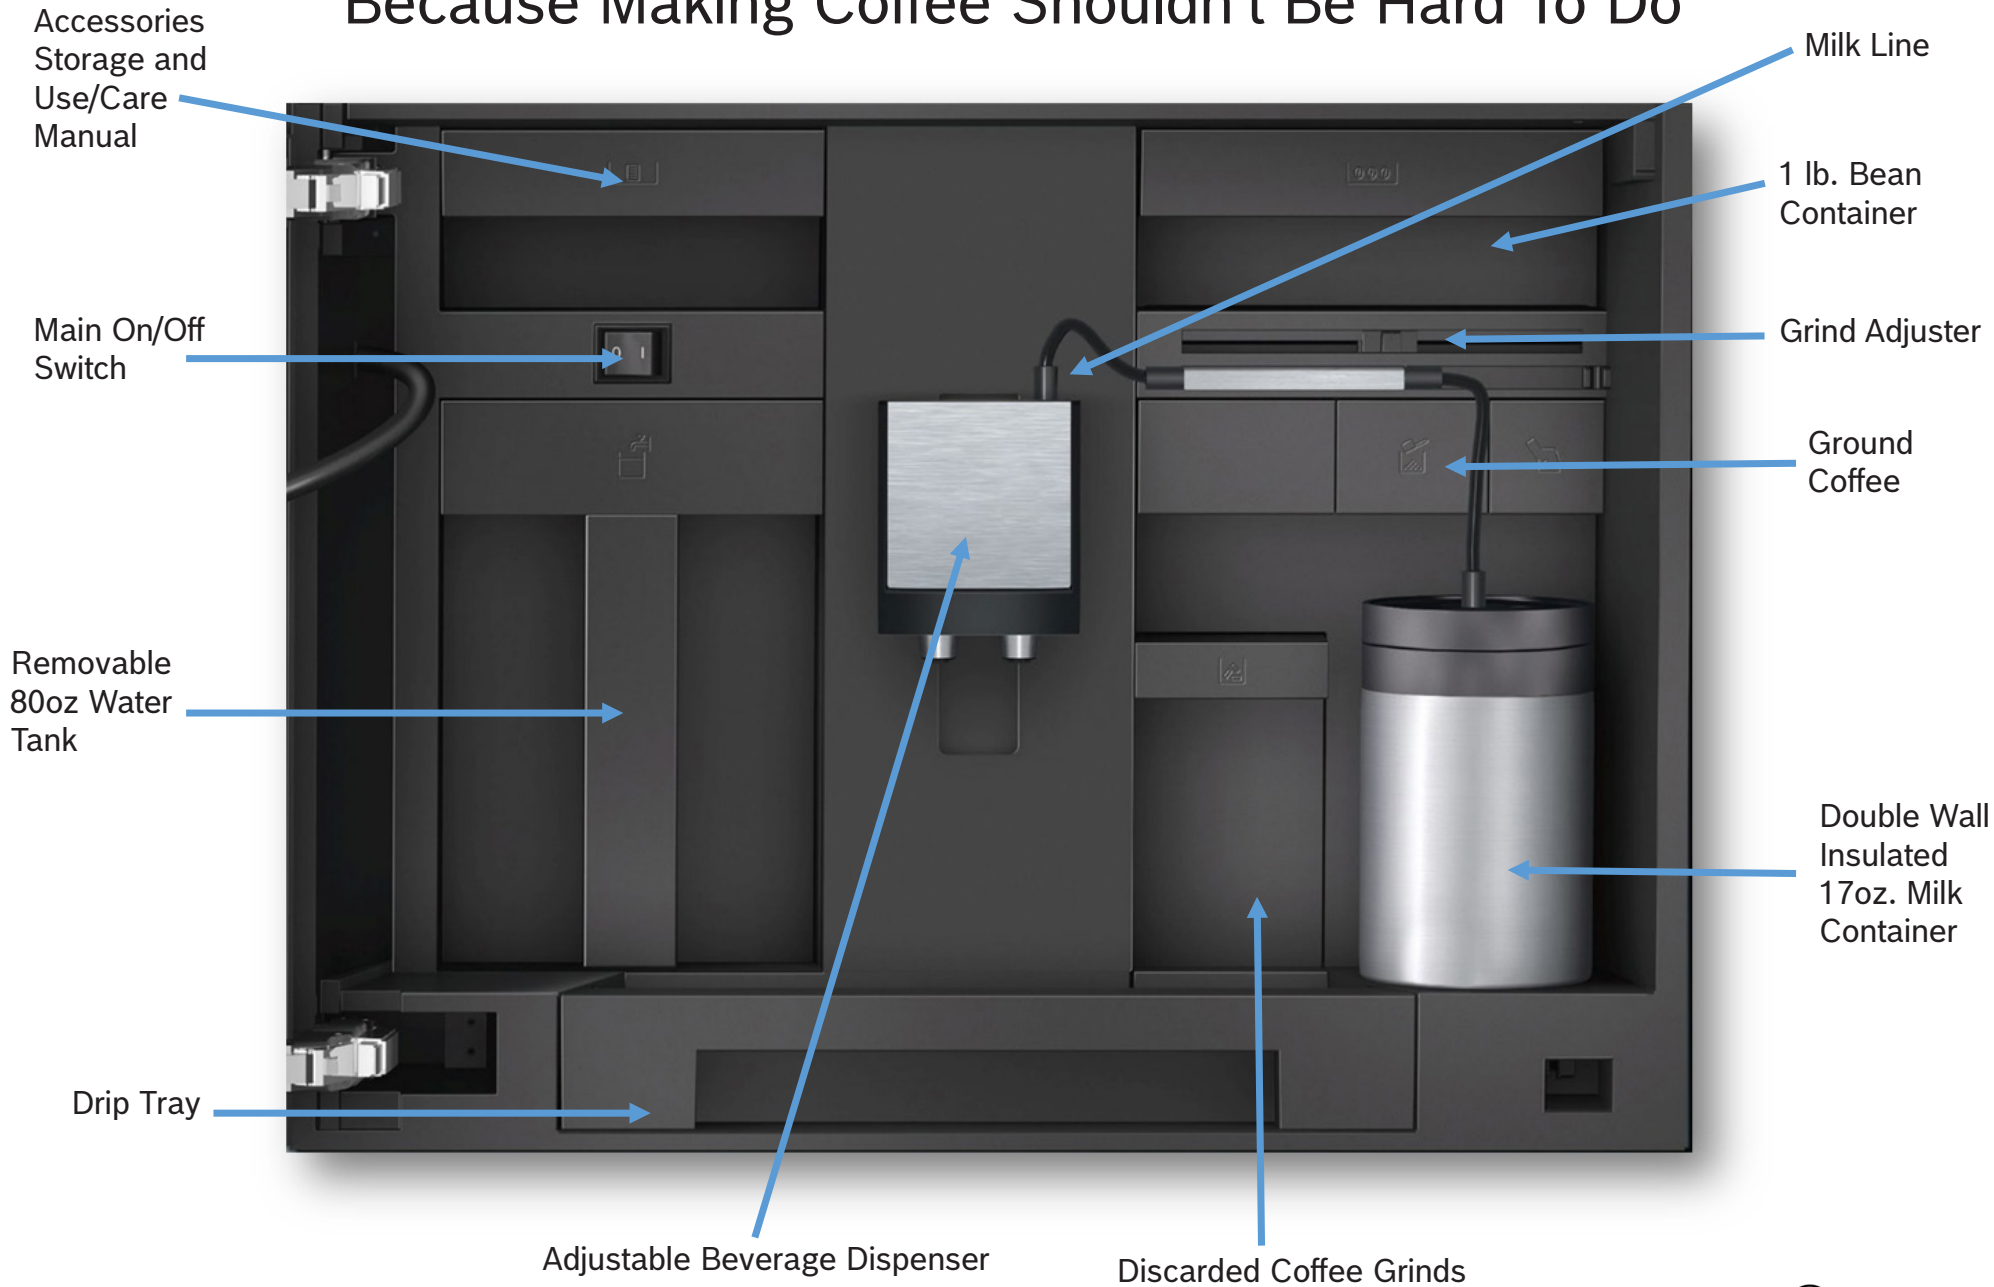

Clean milk system
